CUFP Discussion
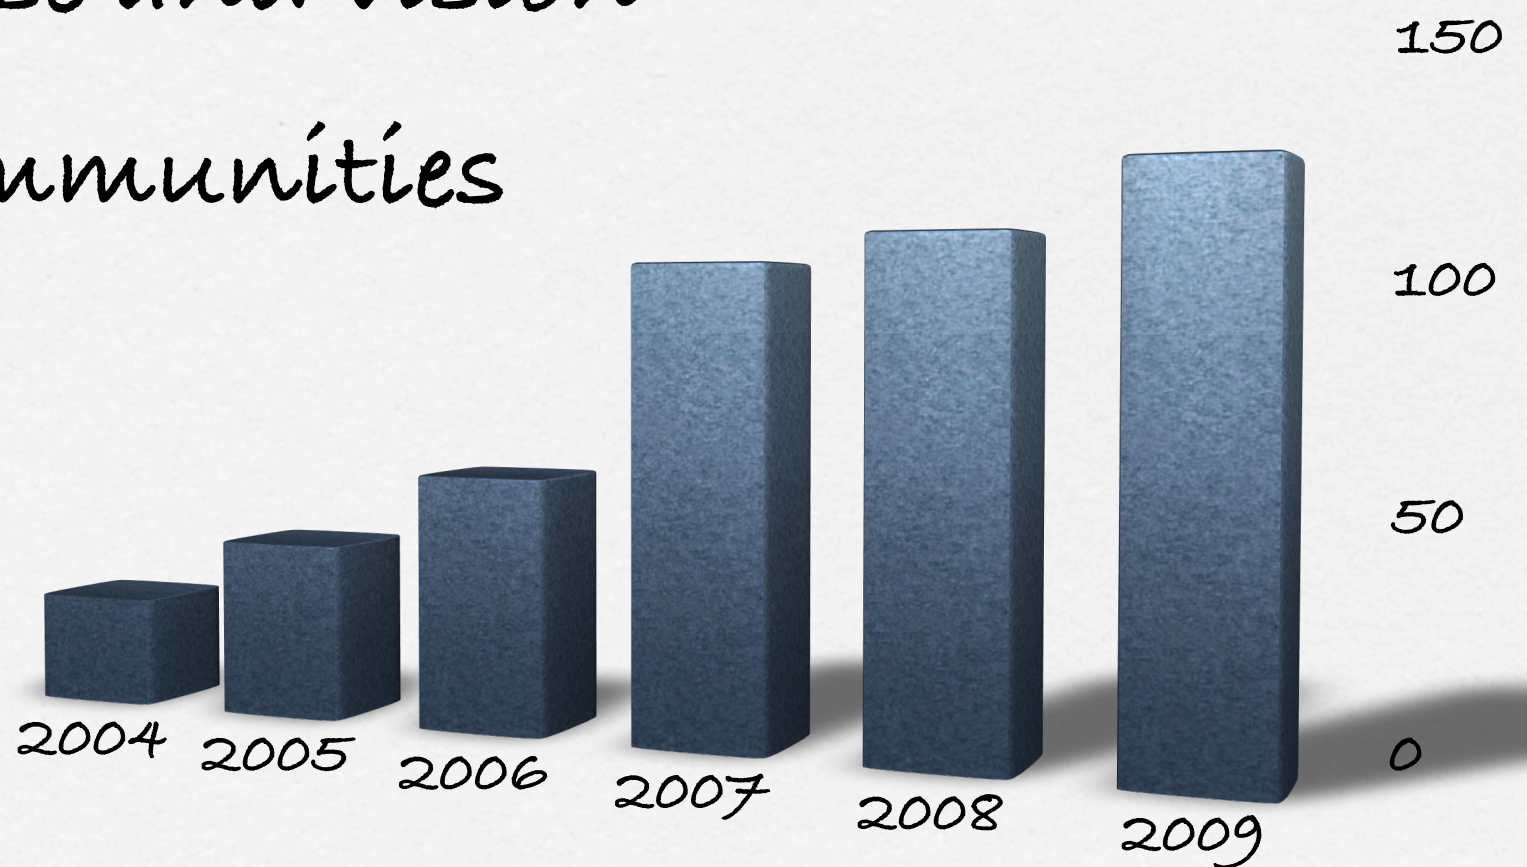

Edinburgh, Sept 2009

John Launchbury, Galois Inc

Intro

- ☐ CUFP purpose and vision
- ☐ Multiple communities

6th CUFP: FP as a means not an end
    More than just a set of talks
    Share experiences (usage, management, hiring)
Who is here for the first time?
Who here is using FP commercially? (user versus researcher)
What language communities: haskell, erlang, scala, o'caml, ml, lisp, scheme, others?
Language consortia, hackathons, books
Who is signed up for the CUFP google group? Who has contributed material?

Discussion starters ...

☐ What are the issues with using FP in your company (pros/cons)?

☐ What do you consider as significant FP milestones this year?

☐ What kinds of lessons could be shared between different FP communities?

☐ Why are you at CUFP? What would have you come again?

☐ What in today's program particularly struck you?

☐ What support could the CUFP community provide you/others?

☐ Anything else?

Commercial tension between FP growth and competitive advantage?
Community supported FAQ
Talk selection: submitted rather than solicited?
Why did you submit a paper? Did you get what you wanted?
